

Solarel™

Solar Electric Roofing is Here

Solarel combines advanced solar thin film technology with the **Adurel Roof Systems** for a single source waterproof and solar cell warranty at greatly reduced applied costs.

Advantages:

Thin Film technology eliminates wind load and added engineering considerations.

Quick simple installation greatly reduces application costs over panel systems.

Advanced broad spectrum light recovery for maximum efficiency in low light, low angles and even under snow.

Adaptable to any roof including metal.

Combined roof/solar warranty to 20 years that is sustainable and renewable for the life of the solar.

Excess power can be sold back to the grid in participating states or stand alone with battery back-up.

Adurel Roof Systems are Energy Star, FM and UL rated and meet NSF 151 for rainwater catchment and recovery.

Beyond Roofing to Energy

Solar energy systems can pay for themselves in four years and generate income for the next 20 before renewal.

Solarel utilizes triple layer amorphous silicone for 20% more delivered energy than poly-crystalline or mono crystalline technology.

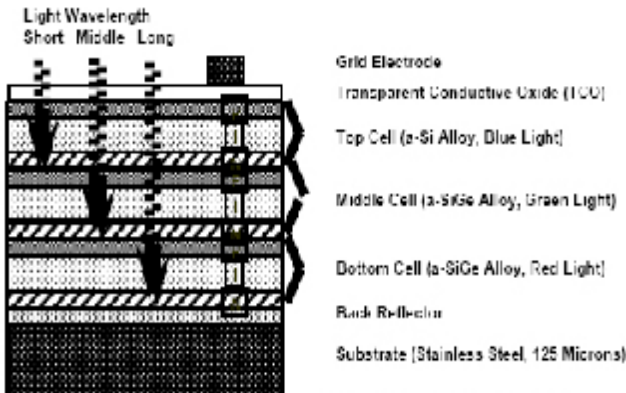

Figure 1 Uni-Solar Triple Junction Cell Light Absorption

Solar systems are government and utility subsidized in participating states for up to 80% cost reduction.

Cost Averages for Solar

\$ W/p	\$7.50-\$10.00 (installed)
\$ /KWh	\$0.12-\$0.20/kWh (after incentives)
Payback (simple)	4-20 years

Areas of high electricity costs will have greater payback.

Consult your tax accountant for tax savings.
